

Screen Printing

Versatile printing technique that transfers ink through a mesh screen onto a surface, using a stencil to create a design. The process involves forcing ink through the open areas of a mesh screen, while blocking it on other areas with a stencil, resulting in a printed image.

Limited Colours | Large Volumes

DTF (Direct-to-Film) Designs are printed onto a special film and then transferred to fabric using heat and

pressure. This method is known for producing vibrant, detailed, and durable prints on various materials.

Unlimited Colours | Lower Volumes

Embroidery

Technique that involves sewing designs directly onto T-shirts or other fabric items using specialized embroidery machines.
